

FIG. 1

A schematic diagram of a medical device, likely a catheter or probe, inserted into a body cavity. The device consists of a central shaft (11) with a distal tip (12) and a proximal handle (13). A dashed line (20) indicates the central axis. A circular component (9) is positioned near the tip, with a smaller circular component (10a) inside it. A larger circular component (7) is also shown, with a dashed line (21a) indicating its central axis. The device is surrounded by a structure (14) with a top edge (15) and a bottom edge (16). A top flange (17) and a bottom flange (18) are also indicated.
